

D80 DRAWBALL SYSTEM

A drawbar with the benefits of a Ball Hitch, the D80 Drawball is a system designed for open field applications such as baling, spraying and tillage.

The working angle of the PTO Shaft is reduced, decreasing overall in-cab vibrations.

Maneuverability is improved as the system allows for a greater turning angle.

Less wear on the system, reducing overall operating costs.

Fully interchangeable with the tow hook & drawbar.

The Drawball eliminates shunting and rattling noises offering operators a quiet towing experience.
