

## KAJO-Korrosionsschutzöl E

**KAJO-Korrosionsschutzöl E** is a mixture of selected mineral oil raffinates and corrosion protection additives. By using a non-ionic surfactant water can be emulsified without problems.

### Practical advantages:

**KAJO-Korrosionsschutzöl E** is excellently suitable for the protection of corrosion-sensitive metal surfaces. Especially in cases where the metal is frequently exposed to condensation water, the application of **KAJO-Korrosionsschutzöl E** is indicated, water is emulsified without problems.

Due to the low base oil viscosity and high wetting ability **KAJO-Korrosionsschutzöl E** protects even at places difficult to access.

### Properties

- very good corrosion protection
- good creep and wetting properties
- high water binding
- sprayable

### Typical characteristics:

Properties	Value	Unit	Test method
Appearance, 20°C	light yellow, clear	-	-
Kin. viscosity at 40 °C	20	mm <sup>2</sup> /s	ASTM D 7042
Density at 20°C	860	kg/m <sup>3</sup>	DIN EN ISO 12 185
Flash point, base oil (COC)	200	°C	DIN EN ISO 2592
Anti-corrosion steel fingers, procedure B	pass		DIN ISO 7120
